

CUSTOMER TESTIMONIAL:

**“Implementing the Briot® Attitude 2 has been effortless. It saves me time so I don’t need to spend extra hours in the office.”**

Dr. Douglas King  
Owner, Family Eye Care Optometry Center

To meet and exceed our customer expectations in the “new normal,” we ensure our equipment is cleaned and ask everyone to wear masks. Our goal is to add new services and technology regularly to ensure each visit is a personalized experience for the patient. Implementing the [Briot® Attitude](#) in-house edging system has streamlined my workflow and allowed my practice to become more efficient as compared to my older equipment. It’s effortless to use and allows me to complete my work in just a few hours. The cost savings allows me to spend more time with my patients on other visual health needs than I have been able to do in the past.

In evaluating my old system, I noted the things I needed to upgrade in a new system. The Briot® Attitude has it all and, thanks to its precision, I no longer have remakes. The equipment edges with the push of a button, providing a high quality and quick lab service. It’s been very helpful and a good addition to my practice, improving our turnaround time for an exceptional patient experience and increased satisfaction.

If you are a current customer, log in to the Luneau Technology Academy and view Dr. King in this webinar hosted by Pentavision: Revolutionize your practice with an in-house finishing lab under the Webinars tab <https://academy.luneautech.com/>.
